Coronavirus Disease 2019 (COVID-19)

People Who Are at Increased Risk for Severe Illness

Updated June 25, 2020

[Print Page](#)

Everyone is at risk for getting COVID-19 if they are exposed to the virus. Some people are become severely ill, which means that they may require hospitalization, intensive care, or breathe, or they may even die. We learn more about COVID-19 every day, and as more information becomes available, CDC will continue to update and share information about risk for severe illness.
