## Calculate duration between two dates

This service calculates the duration, counting the day count and the number of days, months and years between two dates. Among other things, it can be used find how many days old you are and the weekday you were born. Also see the [advanced duration calculator](#) which supports time as well.

### Enter start date

Month:  Day:  Year:    
1-12  
jan-dec      1-31      1-3999[Specify time](#)

### Enter end date

Month:  Day:  Year:    
1-12  
jan-dec      1-31      1-3999[Specify time](#) Include end date in calculation (1 day is added)

## Help and example use
