Our Assessment Products

Our research-based, computerized assessments help educators answer a crucial question: Are my students learning? By delivering precise, real-time information about every student's learning triumphs and challenges, we set educators—and students—up for success.

Measures of Academic Progress (MAP)

Measures of Academic Progress® (MAP®) creates a personalized assessment experience by adapting to each student's learning level. You'll have assessment data—and essential information about what each student knows and is ready to learn within 24 hours.

Keeping Learning on Track

Educators seeking to maximize student growth and engagement while strengthening school communities turn to Keeping Learning on Track® (KLT™), a proven, multi-year embedded formative assessment in curriculum.

Children's Progress Academic Assessment (CPAA)

Prekindergarten and early primary students aren't just small versions of bigger kids—that's why Children's Progress Academic Assessment™ (CPAA™) provides a personalized assessment experience that supports your youngest learners' unique developmental needs.

Quality Growth Data Help You Maximize Student Success

NWEA partners with educators across the globe. Hear why our featured educators believe a focus on growth matters—and how they're maximizing learning for students on, above, and below grade level. [Learn more](#)

Students and Educators Speak Up About Assessment

Results from our independent research study, *Make Assessment Matter*, show one thing clearly: students and educators have a lot to say about assessment! It's the first time any formal study has asked students' opinions, and their responses are making news across the country. [Learn more](#)

[Find Assessments That Fit Your Needs: 10 Questions to Ask](#)

Our short article gives you 10 key questions to ask when you're comparing and contrasting assessments—including why those questions matter.
