Lead Renovation, Repair and Painting Program

Exemptions from the RRP Rule After a Disaster

To ensure that property owners and occupants are able to act quickly to preserve their homes and property in the wake of disasters, the RRP rule includes an emergency provision exempting firms from certain requirements. Read more about post-disaster renovations and lead-based paint.

COVID-19 Policy Statement

EPA's Lead Renovation, Repair and Painting Rule (RRP Rule) requires that firms performing renovation, repair, and painting projects that disturb lead-based paint in homes, child care facilities and pre-schools built before 1978 have their firm certified by EPA (or an EPA authorized state), use certified renovators who are trained by EPA-approved training providers and follow lead-safe work practices.
