▣ The Simulator ▣

The F.A.T.S (Firearms Training Simulator) System

On Target Firearms Training now has the FATS Firearms Training Simulator on line! Face POSSIBLE lethal threat situations and not only have to make instant decisions, but know if it was the right decision and who survived the encounter.

Better to be wrong on the simulator, then on the street or in your home. Each encounter can be replayed to see what went right, or what went wrong. You will know if the proper decision was made... if the target was stopped or if you were stopped.

Factors can be integrated into the simulator such as recoil, running out of ammunition and firearm failures to allow for a complete simulation. Totally interactive with the shooter and the instructor.

Instant Feedback on the 10 foot screen shows your hits, misses and no-lethal hits.

Perhaps you are at an ATM machine, in your bedroom, in your garage, or at a neighbors house. Real time, everyday situations that could manifest themselves into the issues we see every day on the 5:00 PM news.

Completely interactive. The guns are real, however, loaded with computer chips to interact with the software to provide a realistic simulation.

visited 7/6/2011

Many of you have heard about the FATS system, used by police and military. I have the civilian courseware and you can experience real world situations and increase your training level. You are no longer at the movies... you are in it!

Training is offered in 1 hour, or 1 1/2 hour blocks. All training is by appointment only Day and Evenings available Tuesday - Friday. Some weekend times available as well.

Call **303.337.4735 OR 970.214.0824** to set up an appointment.
