

UFED Ultimate

The Premium, All-in-One Mobile Forensic Solution

Cellebrite's UFED Ultimate is the most complete system for mobile forensics, combining logical and physical extraction, passcode recovery and file system extraction. Previously known as UFED Logical plus UFED Physical Pro, UFED Ultimate incorporates the latest and most advanced hardware and software technologies in a user-friendly environment. With a full complement of cables and accessories, UFED Ultimate is the most comprehensive package for mobile forensics.

UFED Ultimate also gives you the widest support in the industry - thousands of mobile phones, smartphones and GPS devices, and covering all major mobile OS: iOS, Android, BlackBerry, Symbian, Windows Mobile and Palm.

UFED Ultimate includes unprecedented analyzing capabilities, including UFED Physical Analyzer – the most powerful, feature-rich extraction & analysis tool; groundbreaking iOS physical extraction, decoding & real-time decryption; Android and BlackBerry extraction & decoding, passcode extraction, GPS extraction & decoding, and much more.
