# How ISO Serves the Property/Casualty Insurance Industry

ISO is the property/casualty insurance industry's leading supplier of statistical, actuarial, underwriting, and claims data. Our analytic and decision-support services help customers compete effectively.

ISO serves insurers, reinsurers, agents and brokers, insurance regulators, risk managers, and other participants in the property/casualty insurance marketplace. Here's an outline of the products and services we offer:

- data to help insurers make independent decisions about their pricing
- statistical and actuarial services
- insurance policy language
- rules needed to write and rate insurance policies
- tools for predictive modeling and scoring of risk
- information about specific properties and communities
- claims data and other information for underwriting
- tools for identifying and preventing insurance fraud
- criminal records and other public information
- motor vehicle records and related information
- information for marketing, loss control, and premium audit
- advanced statistical modeling systems to help customers assess and manage the risk of natural and man-made catastrophes
- tools to help insurers identify and correct rating errors
- tools for estimating property replacement costs and repair costs
- risk consulting services
- specialized consulting, claims-management, and litigation-support services
- rate-quote, underwriting, and policy-management systems for all commercial and personal lines insurance
