

About Us

Who we are

The ITT Technical Institutes are a leading private college system focused on technology-oriented programs of study. There are over 140 ITT Technical Institutes in 38 states. The ITT Technical Institutes predominantly offer career-focused, degree programs to over 70,000 students. The ITT Technical Institutes have been actively involved in the higher education community in the United States since 1969.

What we offer

The seven schools of study at the ITT Technical Institutes [i.e., the School of Information Technology, the School of Drafting and Design, the School of Electronics Technology, the School of Business, the School of Criminal Justice, the School of Health Sciences and the Breckinridge School of Nursing] teach skills and knowledge that can be used to pursue employment opportunities in today's world.¹

Most campus-based ITT Technical Institute programs of study² blend traditional academic content with applied learning concepts, with a significant portion devoted to practical study in a lab environment. Advisory committees, comprised of representatives of local businesses and employers, help each ITT Technical Institute periodically assess and update curricula, equipment and laboratory design.

The ITT Technical Institute at 9511 Angola Court, Indianapolis, IN, offers distance education programs of study online over the Internet. With ITT Technical Institute's online programs of study, a quality education is now available when and where it is convenient for the student.

Possibilities

Students attend classes year-round with convenient breaks provided throughout the year. Class sessions are typically available in the day and evening, depending on student enrollment.

Not all ITT Technical Institutes have all seven schools of study. Please refer to the school catalog of the specific ITT Technical Institute for the schools of study at that particular institute.

Not all ITT Technical Institutes offer Bachelor degree programs, and not all ITT Technical Institutes that offer Bachelor degree programs offer all of the Bachelor degree programs. Not all ITT Technical Institutes offer all of the Associate degree programs. Please refer to the particular ITT Technical Institute's school catalog for a complete listing of the programs of study offered at that institute.
