CannaButter 7 Easy Steps

If you're looking to make some special treats, Cannabutter is a vital ingredient. The process of making cannabutter is basically just melting butter with marijuana, Straining the marijuana And then re-solidifying the butter. This works because THC (the chemical in marijuana that gets you "high") sticks to the fat cells in butter. Cannabutter can be used in any recipe that calls for butter or oil. In this thread I ... How Do They get Strains to Taste Different?

The different tastes of certain strains of cannabis are a product of controlled-breeding programs. The flavour and smell of Cannabis comes from five substances: mono- and sesqui-terpenes, alpha- and beta-pinene, limonene, myrcene, and beta-phalandrene. The amount of each substance present in a given strain will determine the flavor and smell. Author: MedMan ... [Read Full Article](#)
