A Remarkable Place

Sometimes, children living with developmental and behavioral disabilities need a safe, secure place where they can receive expert care along with heartfelt compassion.

Since it first opened a half century ago, Damar Services has been dedicated to being that place. Offered in a village setting, Damar's residential programs provide children with developmental and behavioral disabilities the services, attention, and care they need to become increasingly independent. Damar is funded by the state of Indiana.

When particularly intensive interventions are necessary, Damar Services has the facilities and expertise to produce remarkable results, matched with the kind of care that gives families and caregivers remarkable peace of mind.

Kids' Q&A

With a high degree of statistical certainty, please see the following for our kids' top votes across campus.

Launched Into the Future

Damar loves the children in its residential program, but we also love to celebrate when they leave.

At Damar, we view our residential program as a bridge to a brighter future. We throw a party every time someone moves out of the campus and back into his or her community to celebrate the milestone
