### Gppuopufft

1. Premium data are not available for HMO plans in California's individual market as these plans are regulated by the California Department of Managed Health Care, which does not report premium revenue by market segment. The data used in this analysis to calculate the average monthly premium revenue in California come from one plan, Wellpoint (Anthem Blue Cross), which represented 57% of enrollment in California's individual market in 2010.
2. New York premium and enrollment data include Healthy New York plans sold in the individual market.
