**What sets us apart from other law firms?**

33 years of engineering and accident investigation powerfully combined with 20 years of legal representation to hundreds of injured victims of car and truck accident.

**Our expertise lies in car and truck accidents**

We fully understand what it takes to obtain the highest possible compensation for our clients. Our winning strategy is in our ability to comprehend the engineering and physics of vehicular collisions. Having an appreciation for the mechanical forces involved in an impact is a critical factor. These elements combined with our legal experience provide us with an advantageous edge over those lawyers who lack our engineering and accident investigation background.

**Former National Accident Investigator & Professional Engineer (P.E.) with Federal Government**
