Overview ▼

Authors

Committee on Identifying the Needs of the Forensic Sciences Community; Committee on Science, Technology, and Law(/author/CSTL); Policy and Global Affairs(/author/PGA); Committee on Applied and Theoretical Statistics(/author/CATS); Division on Engineering and Physical Sciences(/author/DEPS); National Research Council

Description

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community.
