Schober test

(redirected from *Schober's test*)

Also found in: [Wikipedia](#).

Schober test

(shō'bĕr),

a measure of lumbar spine motion in which parallel horizontal lines are drawn 10 cm above and 5 cm below the lumbosacral junction in the erect subject; with maximum forward flexion, the distance between the lines increases at least 5 cm in normal patients but far less in patients with ankylosing spondylitis.
