Definitions: Births occurring to women who were unmarried at the time of the birth.

Marital status was obtained from a direct question on the birth certificate in 48 states and the District of Columbia. In Michigan and New York, marital status was inferred from other information on the birth certificate. In 2003, marital status was also imputed for some birth records in the 48 states and the District of Columbia where it was not reported from the direct question. Puerto Rico and Virgin Islands are not included in the U.S. Average.

Data Source: Analysis of 1990-2011 Natality MicroData files from Centers for Disease Control and Prevention, National Center for Health Statistics.

Footnotes: Updated September 2013.

Data are provided for the 50 most populous cities according to the most recent Census counts. Cities for which data is collected may change over time.
