American Housing Survey - Table Creator

Graphics, Publications

The AHS Table Creator gives you the ability to create customized tables from the American Housing Survey without having to use the Public Use File (microdata).

To create a table:

Select area. Option: you may select only one at a time.

Select survey year. For historical AHS data (1973-2009), visit the Data (http://www.census.gov/programs-surveys/ahs/data.html) page. Note: because not all metro areas are sampled each survey year, certain years may be unavailable for a particular area.

Select table. Table row headings match those published in AHS Summary Tables.

Select column variables. Select up to 2 variables. Selecting a second column variable will result in column headings with nested categories. If none is selected, only the total for all occupied units will display.

Optional: use the Tenure and Geography filters to narrow the scope of your table.

Click Get Table.

Optional: download the table in Excel by clicking on the down arrow on the top-right tool bar.

Disclaimer:

Like published tables, AHS Table Creator tabulations may not match estimates derived using the Public Use File (PUF) because the PUF uses topcoding and geographic suppressions used to protect the identities of survey respondents. Cross tabulations displaying an X, or not applicable, in published AHS tables are shown as a "." in Table Creator.
