# DUI: Effects of Alcohol On Metabolism

TASA ID: 434

On January 20, 2011, The TASA Group, Inc., in conjunction with forensic toxicologist Ken Graham, presented a free, one-hour, interactive webinar, *DUI: Effects of Alcohol On Metabolism*, for all legal professionals.

During this program, our presenter covered the following:

- Alcohol Basics
- Pharmacokinetics of Alcohol (absorption, distribution and metabolism)
- Pharmacologic Effects of Alcohol and the Concept of Tolerance
- Methods to Measure Alcohol
- Interpretation and Analysis of Alcohol Test Results
- Recognizing Potential Sources of Error

#### About the Expert

Kenneth D. Graham, Ph.D. is an independent forensic toxicologist and pharmacologist located in suburban Philadelphia, Pennsylvania. Dr. Graham is licensed as a pharmacist in Pennsylvania and serves as a consultant in the pharmaceutical industry.

Dr. Graham has 21 years of experience in the forensic evaluation of cases involving alcohol, DUI, drugs of abuse, medication errors, pharmacy practice and clinical laboratory sciences. He has been called as an expert witness in numerous local and federal jurisdictions in the mid-Atlantic region. His services have been retained by plaintiff and defense counsels and insurance companies. Dr. Graham is a member of the American Association of Forensic Sciences, American Association of Clinical Chemistry and the American Association of Pharmaceutical Scientists. He holds a Bachelor of Arts in biology, a Bachelor of Sciences in pharmacy and a Ph.D. in Pharmacology and Toxicology from Temple University.
