Urine drug monitoring for better pain management

Urine drug monitoring with Ameritox's Rx GuardianSM process goes **beyond standard urine drug testing** and features **Rx Guardian CDSM**, which is derived from the most comprehensive reference database of pain patients who were clinically assessed as adherent. Patients' normalized results are compared to the reference database, allowing clinicians to make more informed assessments of whether their patients are taking medications correctly.

Request more information about medication monitoring by **contacting Ameritox today.**
