What is Lantus® (insulin glargine injection) 100 Units/mL?

Prescription Lantus is a long-acting insulin used to treat adults with type 2 diabetes and adults and pediatric patients (children 6 years and older) with type 1 diabetes for the control of high blood sugar.

- Do not use Lantus to treat diabetic ketoacidosis.

Important Safety Information for Lantus® (insulin glargine injection) 100 Units/mL

Do not take Lantus during episodes of low blood sugar or if you are allergic to insulin or any of the inactive ingredients in Lantus.

Do not share needles, insulin pens, or syringes with others. Do NOT reuse needles.

Before starting Lantus, tell your doctor about all your medical conditions, including if you have liver or kidney problems, if you are pregnant or planning to become pregnant or if you are breast-feeding or planning to breast-feed.

Heart failure can occur if you are taking insulin together with certain medicines called TZDs (thiazolidinediones), even if you have never had heart failure or other heart problems. If you already have heart failure, it may get worse while you take TZDs with Lantus. Your treatment with TZDs and Lantus may need to be changed or stopped by your doctor if you have new or worsening heart failure. Tell your doctor if you have any new or worsening symptoms of heart failure, including:

- Shortness of breath
- Sudden weight gain
- Swelling of your ankles or feet

Tell your doctor about all the medications you take, including OTC medicines, vitamins, and supplements, including herbal supplements.

Lantus should be taken once a day at the same time every day. Test your blood sugar levels while using insulin, such as Lantus. Do not make any changes to your dose or type of insulin without talking to your healthcare provider. Any change of insulin should be made cautiously and only under medical supervision.

Do NOT dilute or mix Lantus with any other insulin or solution. It will not work as intended and you may lose blood sugar control, which could be serious. Lantus must only be used if the solution is clear and colorless with no particles visible. Always make sure you have the correct insulin before each injection.

While using Lantus, do not drive or operate heavy machinery until you know how Lantus affects you. You should not drink alcohol or use other medicines that contain alcohol.

The most common side effect of insulin, including Lantus, is low blood sugar (hypoglycemia), which may be serious and life threatening. It may cause harm to your heart or brain. Symptoms of serious low blood sugar may include shaking, sweating, fast heartbeat, and blurred vision.

Lantus may cause serious side effects that can lead to death, such as severe allergic reactions. Get medical help right away if you have:

- A rash over your whole body
- Swelling of your face, tongue, or throat
- Trouble breathing
- Shortness of breath
- A fast heartbeat
- Extreme drowsiness, dizziness, or confusion
- Sweating

Other possible side effects may include swelling, weight gain, low potassium levels, injection site reactions, including changes in fat tissue at the injection site, and allergic reactions.

Lantus SoloStar® is a disposable prefilled insulin pen. Please talk to your healthcare provider about proper injection technique and follow instructions in the Instruction Leaflet that accompanies the pen.

Eligibility Restrictions & Offer Terms:

Insulins Valyou Savings Program:

Sanofi insulins included in this program are: ADMELOG® (insulin lispro injection) 100 Units/mL, TOUJEO® (insulin glargine injection) 300 Units/mL, LANTUS® (insulin glargine injection) 100 Units/mL and APIDRA® (insulin glulisine injection) 100 Units/mL. This offer is not valid for prescriptions covered by or submitted for reimbursement under Medicare, Medicaid, VA, DOD, TRICARE, similar federal or state programs, including any state pharmaceutical programs, or commercial / private insurance. Only people without prescription medication insurance can apply for this offer. Void where prohibited by law. For the duration of the program, eligible patients will pay \$99 for up to 10 vials or packs of pens per fill. Offer is valid for one fill per month. To pay \$99 per month, you must fill all your Sanofi Insulin prescriptions at the same time, together each month. Not valid for SOLIQUA 100/33 (insulin glargine and lixisenatide injection) 100 Units/mL and 33 mcg/mL or Toujeo Max SoloStar pen. When using the Insulins Valyou Savings Card, prices are guaranteed for 12 consecutive monthly fills. The Insulins Valyou Savings Program applies to the cost of medication. There are other relevant costs associated with overall treatment.

Sanofi Copay Program:

This offer is not valid for prescriptions covered by or submitted for reimbursement under Medicare, Medicaid, VA, DOD, TRICARE, or similar federal or state programs including any state pharmaceutical assistance program. Important to note that if you have an Affordable Care (Health Care Exchange) plan, you may still be qualified to receive and use this savings card. Please note: the Federal Employees Health Benefits (FEHB) Program is not a federal or state government health care program for purposes of the savings program. Void where prohibited by law.

- Lantus: \$0 copay with maximum savings up to \$600 per pack up to 3 packs per fill;
- Toujeo: \$0 copay for the first 3 fills, then \$10 copay for the next 12 fills. Maximum savings up to \$600 per pack up to 3 packs per fill;
- Soliqua 100/33: \$0 copay with maximum savings up to \$800 per pack up to 1 pack per fill;

Savings may vary depending on patients' out-of-pocket costs. Upon registration, patients receive all program details. Sanofi US reserves the right to change the maximum cap amount, rescind, revoke or amend these programs without notice.

If you are a patient experiencing problems with a Sanofi US product, please contact Sanofi US at 1-800-633-1610.
