What is Partnership?

Community Care's Family Care Partnership Program (HMO SNP) ("Partnership") for frail elders and adults with physical, intellectual or developmental disabilities provides comprehensive medical and long-term care and prescription drugs. The focus is to help you live as independently as possible in the community.

As a member of Partnership, you will have a team of professionals that work with you to coordinate all aspects of your care. Your team will assess your needs and develop a cost-effective care plan.

Partnership Highlights:

No co-pays, deductibles or insurance gaps. Partnership members have access to medical care, long-term care services and prescription drugs without the worry of insurance bills, co-pays, deductibles or insurance gaps.

Care for all your needs. Our Partnership program is designed to provide fully-integrated care, including medical, pharmacy, residential and home and personal care services.

Join a team of professionals. Each Partnership program member works with a team including a nurse practitioner, care manager and registered nurse. You and your team will evaluate your needs, abilities, resources and preferences and develop your care plan. Your team will then coordinate and authorize the services that will help you achieve the outcomes identified in your care plan.

You play an active role in your plan. Partnership members, their families and authorized representatives are encouraged to take an active role in developing the care plan. We will work with you to determine your strengths, resources and which services and supports meet your needs and are cost-effective and make sure your care plan continues to work for you.

You can manage your own services. As a member of the Partnership program, you can choose the [Self-Directed Supports \(SDS\)](#) option to manage some or all of your long-term care services. Choosing SDS means you will have more say in how and from whom you receive services.
