Uses

Dicyclomine is used to treat a certain type of intestinal problem called **irritable bowel syndrome**. It helps to reduce the symptoms of **stomach** and intestinal cramping. This **medication** works by slowing the natural movements of the gut and by relaxing the muscles in the **stomach** and **intestines**. Dicyclomine belongs to a class of drugs known as anticholinergics/antispasmodics.

This medication must not be used in children younger than 6 months old because of the risk of serious side effects.

How to use Bentyl

Take this **medication** by **mouth** with or without food as directed by your doctor, usually 4 times a day. To reduce your risk of side effects, your doctor may direct you to start this medication at a low dose and gradually increase your dose. Follow your...
