We offer specialized assistance with

Rx Destroyer™ is Trusted By

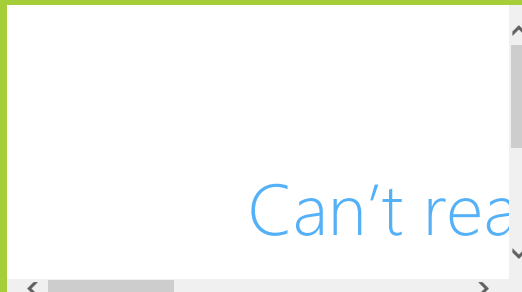

Pharmaceutical Waste Disposal

Rx Destroyer™ provides *pharmaceutical waste management* solutions with compliance to Drug Enforcement Administration, DEA, and Environmental Protection Agency, EPA, regulations. Our patented, fast acting formula begins neutralizing medications on contact, with no need to add water or batteries, no flammable powders and never requires long term contracts. Our mutual success is based upon utilizing Rx disposal compliance solutions which are safe, easy and affordable.

Proper pharmaceutical waste disposal procedures are critical to prevent drug abuse, drug diversion, stockpiling and contamination of our water supply. As part of our Safe Water Initiative, Rx Destroyer™ brands are landfill friendly, supporting EPA and DEA efforts to prevent leaching of pharmaceuticals into drinking water, soil and waterways and may be discarded with common trash*.

**Always follow facility, local, state, tribal and federal laws under which you're governed*

promoting efficiency in busy hospitals and surgical centers. Our simple to use Rx Destroyer™ family of products offer an unmatched range of disposal container sizes available in 4 oz. to 30 gallon drums and everything in between to serve any environment or budget. Additional available features include a view gauge and the very attractive Rx Lockbox™ made of durable steel with a high quality keyed lock.

Rx Destroyer™ provides ready-to-use, chemical drug destruction for all purpose and liquid medications including pills, capsules, patches, powders, suppositories, liquids and cannabis waste. We offer [mass disposal](https://www.rxdestroyer.com/masswastedisposal/) (<https://www.rxdestroyer.com/masswastedisposal/>) solutions and assistance in understanding the difference in medication disposal for ultimate users and DEA registrants. Our drug disposal products are the most recommended, products are found in pharmacies across the United States and South America.

Drug Disposal Compliance Made Easy

Our chemical drug destruction of pharmaceutical waste meets DEA “non-retrieval” standards and meets or exceeds disposal regulations for solid waste in most states. Please refer to your facilities’ federal, local, state and tribal regulations and see [compliance regulation section \(/dea-compliant-pharmaceutical-disposal-regulations/\)](#) for more information and for links to state regulations. Rx Destroyer™ provides quick and seamless facility implementation to hospitals, pharmacies, long term care facilities, government (VA) and correctional facilities and more with on-site, phone or web based tutorials for compliance made easy.

Drug Disposal As Easy As 1, 2, 3...

- No Adding Water...No Batteries...No More Worrying
- Simply load unused or unwanted medications into the bottle
- Gently shake to mix patented solution over medications
- Discard bottle with contents into common trash*

**Always follow facility, local, state, tribal and federal regulations*

Why Pharmaceutical Disposal Regulations are So Critical

<https://www.rxdestroyer.com/wp-content/uploads/Why-Rx-Disposal-regulations-are-so-important.jpg>

Drug diversion is an epidemic in the United States with more than 130 people dying of overdose daily and causing an economic, multi-billion dollar burden. Several studies by the EPA and the [U.S. Geological Society \(https://toxics.usgs.gov/pubs/FS-027-02/index.html\)](https://toxics.usgs.gov/pubs/FS-027-02/index.html) reveal the presence of pharmaceuticals in our water supplies. Rx Destroyer™ provides pharmaceutical waste management and disposal solutions as part of our simple, yet profound fundamental goal:

Testimonial

“I use Rx Destroyer™ in all my departments in my hospital, and several other facilities in our corporation use it as well. We’ve found it to be the perfect product for small hospitals. Since the COVID outbreak,

having access to Rx Destroyer has become even more important because it gives us the ability to just dedicate an Rx Destroyer™ jug to the COVID area for medication waste, then discard of the jug without it ever leaving the COVID area.”
