HIGH VOLUME MANUAL INDEX UNITS

AUTOMATED SHOT BLASTING & SHOT PEENING EQUIPMENT MANUFACTURER

Engineered Abrasives® specializes in the finest automated shot blasting and shot peening equipment ([shot-peening-equipment.html](#)) designed for your specific application. Since 1935, Engineered Abrasives® has offered a range of custom shot peening and shot blasting machines to meet the requirements of all industries ([industries-served.html](#)), from automotive to aerospace and medical to heavy equipment. Gears, turbine blades, shafts, connecting rods, engine blocks, and many other parts across various industries are shot blasted and peened with Engineered Abrasives®-manufactured machines every day. Contact us today to find a solution for your shot blasting needs.

Engineered Abrasives® Quality Assurance policies, objectives, and the application of principles are to assure that all service customer's stated requirements and quality expectations.

SHOT PEENER OF THE YEAR

We are proud to announce that our President, Mike Wern, was named the 2014 Shot Peener of the Year by The Shot Peener.

"Mike's machines are robust enough that they can work 24/7 and his control panels are so operator friendly that EA gives as a controllable, repeatable process. Engineered Abrasives' machines have done more than build the company's reputation; they have validated the validity of shot peening in the U.S. automotive industry," - Jack Champaigne, Editor of The Shot Peener magazine

Look for **RED** components and surfaces to be sure you get Engineered Abrasives® quality equipment OEM parts.

Automated Shot Peening Machines

Shot peening is used to finish metal parts that require increased wear and fatigue properties. In the process, shot bombards the metal part, creating small dimples in the surface.
