Uses

[Mifepristone](#) (also known as RU 486) is used to cause an [abortion](#) during the early part of a [pregnancy](#). It is used up to week 10 of pregnancy (up to 70 days after the first day of your last menstrual period). Mifepristone must not be used if you have a rare abnormal pregnancy that is outside the womb ([ectopic pregnancy](#)). It will not cause an [abortion](#) in this case. It may cause an ectopic pregnancy to rupture, resulting in very serious bleeding.
