What We Do

Driving commerce and growth through the power of GS1 Standards

More than 300,000 members across 25 industries turn to GS1 US® for help with improving operations, addressing industry challenges, and positioning their businesses to respond to changing market conditions by leveraging GS1 Standards.

We don't do that for our members. We do it with them. As a neutral and not-for-profit membership-based organization, we are guided and governed by our users. In this unique role, GS1 US actively brings together the business community under our leadership to identify issues impacting their business or industry and build consensus around best practices using standards-based solutions.

We also work with individual organizations to help implement company-level solutions that use global standards to make supply chain business processes better.

Standards

See how standards provide a common foundation to drive businesses forward.
