The best technique and true definition is waking up and (in bed) immediately smoking the 'pre-packed' bong that is sitting 'ready to smoke' on your bedside table. Can be used to describe any situation where someone smokes weed up to 1 hour after waking up.

The act of waking up of a morrow and partaking of the chronic by means of a bong without leaving the comfort of one's bed. Made possible by possession of a serving wench/ad to present baking instuments and narcotics on a silver tray or, failing this convenience, the forethought to leave apparatus within reach of the squad heap where one collapsed in a munted stupor the previous evening.
