## PROPYLENE GLYCOL

*99.9% Propylene Glycol*

**What is Propylene Glycol?** It is a by product of the product of petroleum.

**When to Use?** In applications that do not require Food and Beverage USP certification, but require pure Propylene Glycol.

## 95% CORROSION INHIBITED PROPYLENE GLYCOL

**What is Corrosion Inhibited Propylene Glycol?** It is a propylene glycol base product that contains a corrosion inhibitor to minimize corrosion in process waters.

**When to Use?** Water process applications that have iron, copper, low grade stainless steel, etc. and require corrosion protection. Not intended for use in water systems where contact with Potable Water or Food is possible.

## CORROSION INHIBITED USP GRADE PROPYLENE GLYCOL

*95% Corrosion Inhibited USP grade Propylene Glycol*

**What is Corrosion Inhibited USP grade Propylene Glycol?** It is a propylene glycol base product that contains a corrosion inhibitor to minimize corrosion in process waters and it is certified for use in food and beverage facilities.

**When to Use?** Water process applications that have iron, copper, low grade stainless steel, etc. and require corrosion protection and may come in contact with potable water or food.

**What is Glycerin USP Kosher?** It is a kosher and food grade certified grade of Glycerin. This grade of glycerin has been packaged in a class 8 clean room and is safe for all your beverage, food, and medical applications. Kosher is a certification by the orthodox church that allows the product to be used in kosher certified product. USP labeling implies that it conforms to all the legal and certification requirements of USP packaging and manufacturing. This **Glycerin USP product** comes in 1, 5, and 55 **USP** gallon containers.

**When to Use?** Food and Beverage applications where you require USP certification.

## GLYCERIN

**What is Glycerin?** This is a pure Glycerin product.

**When to Use?** For applications that do not require USP certification.

## International Orders

We can ship to your door step anywhere in the world. For large international orders, it is more cost effective to use export brokers. Please [email us](#) direct with your Shipping Address and Products requests so we may quote you direct.

## Manufactures & Suppliers
