Coronavirus Disease 2019 (COVID-19)

Symptoms of Coronavirus

- The virus that causes COVID-19 is new. Therefore, anyone who has not already been exposed to the virus is at risk.
- Anyone can have mild to severe symptoms.
- Older adults and people who have severe underlying medical conditions like heart disease, diabetes, and lung disease seem to be at higher risk for developing more serious complications from COVID-19.

Watch for symptoms

People with COVID-19 have had a wide range of symptoms reported – ranging from mild symptoms to severe illness.

Symptoms may appear 2-14 days after exposure to the virus. People with these symptoms may have COVID-19:

- Cough
- Shortness of breath or difficulty breathing
- Fever
- Chills
- Muscle pain
- Sore throat
- New loss of taste or smell
- This list is not all possible symptoms. Other less common symptoms have been reported, such as nausea, vomiting, or diarrhea.

When to Seek Emergency Medical Attention

Look for emergency warning signs* for COVID-19. If someone is showing any of these symptoms, seek medical care immediately

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion
- Inability to wake or stay awake
- Bluish lips or face

*This list is not all possible symptoms. Please call your medical provider for any other symptoms concerning to you.

Call 911 or call ahead to your local emergency facility: Notify the operator that you are someone who has or may have COVID-19.
