Custom Development Services

We are always interested to learn more about our clients testing needs and how we can collaborate to meet industry needs. We have multiple new products in the pipeline and the capacity to add more where warranted.

If you are interested in partnering with us to develop a custom assay for your organization, we offer those services as well. With more than 10 researchers on staff who are experienced in immunoassay and molecular test development, we can offer you aggressive development timelines and competitive pricing.

Contact us at Info@agdia.com for more information.
