Information for Individuals with Disabilities

USES and all other Department of Labor Agencies, maintain a policy prohibiting discrimination against individuals with disabilities in all publications and materials distributed or made available to the public. The information in this document will be made available to sensory impaired individuals upon request. Information on specific job or worker traits may be obtained by voice phone directly from the nearest Occupational Analysis Field Center listed below:

Massachusetts Occupational Analysis Field Center
Research and Statistics Section
Charles Hurley Building, Second Floor
Government Center
Boston, Massachusetts 02114
(617) 727–6718

Michigan Occupational Analysis Field Center
Michigan Employment Security Commission
7310 Woodard Avenue, Room 425
Detroit, Michigan 48202
(313) 876–5140 or 876–5198

Missouri Occupational Analysis Field Center
Division of Employment Security

505 Washington Avenue

Foreword

The *Selected Characteristics of Occupations Defined in the Revised Dictionary of Occupational Titles* (SCO) is published in response to the special needs of public and private organizations for more detailed occupational data than that contained in the *Revised Fourth Edition Dictionary of Occupational Titles*. This document provides, in a single volume, a wide range of occupational information with a variety of applications ranging from job placement to occupational research, career guidance, labor market information, curricula development and long range job planning. This information may prove very timely and helpful to employers and organizations adjusting to regulations under the Americans with Disabilities Act.

Data contained in this book supersede the information presented in the three previous editions including *Selected Characteristics of Occupations* (1966), *Selected Characteristics of Occupations by Worker Traits and Physical Strengths* (1968) and *Selected Characteristics of Occupations Defined in the Dictionary of Occupational Titles* (1981).

The information documented in the *SCO* was developed using the methodology and benchmarks used in the USES Occupational Analysis Program for gathering and recording information about jobs listed in the *Dictionary*. In this document, adjunct data on specific vocational training time, physical demands, and environmental conditions are listed for each occupation defined in the *Dictionary* and grouped according to interest factors identified in the *Guide for Occupational Exploration*. Explanations of the rating structures for Physical Demands and Environmental Conditions are found in Appendixes C and D.

Among other uses, the data can be helpful in determining the potential for an impaired or disabled individual to transfer from one occupation to another. In addition, it can also help job interviewers or counselors evaluate an individual's skills learned on the job, in the military, or through non-job experience or interests, and help determine new careers for displaced workers as well as benefits eligibility for impaired workers.

Other major Occupational Analysis products which are based on information in the same data base include the *Revised Fourth Edition Dictionary of Occupational Titles*, the *Revised Handbook for Analyzing Jobs*, and the *Revised Guide for Occupational Exploration*. All of these publications are available from the U.S. Government Printing Office.

Robert A. Schaerfl
Director
U.S. Employment Service

Viewed on March 27, 2019

Acknowledgements

The revised *Selected Characteristics of Occupations* (SCO) was produced under an Interagency agreement with the Social Security Administration by the U.S. Employment Service under the direction of Robert A. Schaerfl, director. The Occupational Analysis Program is directed by Susan C. Schlickeisen, chief, Division of Planning and Operations. Coordination and technical supervision for the development of the revised *SCO* was directed by Russ Kile, Personnel Research Psychologist, of the Operations unit. Acknowledgement is also gratefully given to John Hawk, Personnel Research Psychologist, and Kathleen Wiersema for the contribution of additional technical planning and support.

This publication was produced and developed through the efforts of the following Occupational Analysis Field Centers, operated through the State Employment Services; Boston, Massachusetts, Paul Clearly, Supervisor; Detroit, Michigan, Tom Kearney, Supervisor; St. Louis, Missouri, Doris Phelan, Supervisor; Raleigh, North Carolina, Stan Rose, Supervisor; and Salt Lake City, Utah, Barbara Smith, Supervisor.

Space does not permit a listing of their names, but grateful acknowledgement is also given to those associations, business firms, labor organizations, and other Federal Agencies, and Individuals whose assistance and cooperation contributed significantly to the development of this publication.

Special Notice

Data contained in the *Selected Characteristics of Occupations Defined in the Revised Dictionary of Occupational Titles* (SCO) reflects certain elements of work as they have generally been been found to occur in jobs, but these ratings may not coincide in every respect with the content of jobs as performed in particular establishments or at certain localities. Data presented in this revised *Selected Characteristics* were collected and organized according to job analysis methodology developed by the US Employment Service through affiliated State Occupational Analysis Field Centers. Users who need more specific job requirements should supplement this data with local information detailing jobs within their community.

In preparing this document, no data elements regarding wages or hours of work have been collected. Therefore, data contained in this publication should not be considered a judicial or legislative standard for wages, hours, or other contractual or bargaining elements.

Material contained in this publication is in the public domain and may be reproduced fully or partially, without the permission of the Federal Government. Electronic distribution of this information is under a grant agreement with the North Carolina Occupational Analysis Field Center. Source credit is requested but not required.

Comments or inquiries regarding data elements included in the revised *SCO* are invited and should be addressed to:

Mr. Stanley Rose, Supervisor
North Carolina Occupational Analysis Field Center
Employment Security Commission of North Carolina
Post Office Box 27625
Raleigh, North Carolina 27611
Telephone (919) 733-7917 FAX (919) 733-0981

Introduction

Description and Arrangement of Data

The *SCO* provides supplemental information on all occupations printed in the revised fourth edition *Dictionary*. Each occupation is listed in both Part A: "Titles Arranged By Guide for Occupational Exploration Group, SVP, and Strength Level" and Part B: "Index of Titles by *Dictionary* of Occupational Titles Code."

Part A lists occupations that have been sorted by several Worker Characteristics components. Worker Characteristics are job analysis components which reflect worker attributes that contribute to successful for job performance. Each *Dictionary* occupation has been rated for these various Worker Characteristic components to provide information for determining a worker's suitability for a particular job. Additional information about Worker Characteristics and the techniques of job analysis as used by occupational analysts affiliated with the U.S. Employment Service may be found in the Revised Handbook for Analyzing Jobs (HAJ), 1991.

The first level of organization is according to the Guide for Occupational Exploration (GOE) code; the second is by the Specific Vocational Preparation (SVP) rating; the third is based on the Strength Level (SL); the final arrangement is by DOT code. All codes within each sort are in ascending order (from lowest to highest).

Because sorting by these Worker Characteristic components negates or loses the numerical and alphabetical sorting features of the *Dictionary*, the *SCO* provides a crosswalk between DOT and GOE codes. Part B lists all occupations in the *Dictionary*, in ascending order by DOT code with a corresponding reference to their respective GOE code. This feature enables the use to quickly determine a DOT code's location with the GOE classification structure contained in Part A.

Users who do not have access to the DOT code of an occupation, are directed to the "Alphabetical Index of Occupational Titles" in the *Dictionary* itself. Both the *Dictionary* and Part of the *SCO* contain occupations arranged by DOT code. In addition, each entry in Part B as well as the definition trailer in the *Dictionary* include the GOE code and Strength Level of the corresponding occupation.

Viewed on March 27, 2019

Part A: Titles Arranged By Guide for Occupational Exploration Group, SVP, and Strength Level

Part A of the *SCO* contains ratings or values for some of the components used in the Occupational Analysis Program of the U.S. Employment Service. (Additional information about these and other components of occupational analysis used in USES may be found in Appendix A in this publication as well as the HAJ.) These components are also briefly explained in the following paragraphs. Occupations are arranged according to the ratings of some of these components (GOE, SVP, SL, and DOT Code). The values of other component ratings (Physical Demands, except Strength Level, and Environmental Conditions; DOT Title; and Industry Designation) are referenced even through they were not used in the sorting process.

1. Guide for Occupational Exploration

The first level of arrangement in Part A is according to the GOE codes. (Appendix A: ''Using Selected Characteristics for Occupational Exploration'' contains additional information about the GOE structure.)

The GOE structure contains 66 Work Groups and 348 subgroups. Work Groups, represented by the first four digits of the GOE code, contain occupations which are of the same general type of work and require the same adaptabilities and capabilities of the worker. The Work Group code, title, and definition appear at the top of the list of occupations within the Work Group.

Subgroups, identified by the last two digits of the GOE code, represent specific clusters of occupations within Work Groups. Subgroup codes and titles precede the list of occupations within the Subgroup. Subgroups range in size from one to 430 occupations.

2. Specific Vocational Preparation

Within GOE Subgroups, occupations are further sorted by SVP. The SVP structure provides a means to cluster occupations which require a similar amount of time for workers to learn the skills, knowledges, and abilities required to achieve acceptable performance in a specific occupation. Appendix B: ''Specific Vocational Preparation'' contains additional information about SVP.

3. Strength Level and Other Physical Demands

After SVP, occupations are sorted by Strength Level. The five Strength Levels (Sedentary, Light, Medium, Heavy, and Very Heavy) provide a means to rank occupations by the amount of force or physical effort exerted by workers. Appendix C: ''Physical Demands'' contains additional information about Strength Level and nineteen other Physical Demand components.

4. Environmental Conditions

The Environmental Condition components provide a means to describe the immediate surroundings in which workers must perform a job. Appendix D: ''Environmental Conditions'' contains additional information about the Environmental Condition components. None of these components were used to rank occupations in Part A.

5. DOT Code

The final sort of occupations within a GOE Subgroup is by nine-digit DOT code. The DOT code structure provides unique identification as well as a means to cluster occupations which require workers to perform similar tasks. Appendix E: ''Occupational Code Number'' contains additional information about the DOT code structure.

6. DOT Title

The DOT title is the title by which the occupation is known in the majority of establishments in which analysts found the job.

7. Industry Designation

The industry designation is the information that appears in parentheses after the DOT title. Because some occupations are found in more than one industry, some occupations may have up to four industry designations. The DOT industry designation provides one or more additional items of information about an occupation. In the following list, the industry designations are examples of additional information. Those listed are not the only ones which provide this type of information.

Viewed on March 27, 2019

- location of the occupation (hotel & rest.; machine shop)
- types of duties associated with the occupation (education; forgoing)
- products manufactured (optical goods; textile)
- processes used (electroplating; petrol. refin.)
- raw materials used (nofer. metal; stonework)

Part B: Index of Titles by Dictionary of Occupational Titles Code

Part B of the *SCO* contains occupations arranged numerically by nine-digit DOT code. In addition, the listing for each occupation includes the COE code, Strength Level, DOT title, an industry designation. Brief explanations of each of these components appeared in the previous section.

Identification Key

The Identification Key, on the last two pages of the *SCO,* is provided to aid users with the identification of the numbers, letters, and headings for the columns for the DOT code, Specific vocational Preparation, Physical Demands, and Environmental Conditions in the tables of Part A and B. The key may be photocopied or removed and used as a desk reference.

Collection and Aggregation of Data

The Occupational Analysis Program, within the United States Department of Labor, does not establish or dictate titles, descriptions or characteristics of occupations. Analysts do not participate in individual negotiations between individual establishments and employees regarding tasks or positions.

Analysts rate jobs, not workers. Based upon face-to-face observation/interviews with incumbents and/or their supervisors, analysts rate what jobs require of workers and not what individuals workers bring to specific jobs. Therefore, there are instances when the individual qualifications of a worker or the specific hiring requirements of an establishment for a specific position do not match the characteristics of a broadly defined occupation.

In some situations people use the words element, task, position, job and/or occupation as synonyms. The United States Employment Service (USES) developed and uses the following definitions as well as one for ''establishment'' to prevent confusion during (1) collection and analysis of source material and (2) compilation of that source material into *Dictionary* definitions

An **Element** is the smallest step into which it is practical to subdivide any work activity without analyzing separate motions, movements, an mental processes.

A **Task** is one or more elements. It is a distinct activity in the logical and necessary steps or work performed by an individual. Any human effort, physical or mental, exerted to accomplish a specific purpose is a task.

A **Position** is a collection of tasks that constitute the total work assignment of a single worker. (There is one position for every worker in the country.)

A **Job** is a group of positions, within an establishment, which are identical with respect to their major or significant tasks and are sufficiently alike to justify inclusion within a single piece of source material. (Element, task, and job are relative concepts. An activity that is an element in one job may be a task or even entire job in other position-worker settings.)

An **Occupation** is a group of jobs, found at more than one establishment, in which a common set of tasks are performed or are related in terms of similar objectives, methodologies, materials, products, worker actions, or worker characteristics.

An **Establishment** is a public private employing unit that produces, provides, and/or sells goods or services at a single, physical location. It may range in size from a single, self-employed worker to thousands of workers. Within an establishment , there may be one or many persons employed in the same job.

After reading the definitions from ''element'' through ''occupation,'' users should understand that analysts compile information from many jobs into an occupation definition. the occupation information available in the *Dictionary,* either its printed or electronic versions and support documents, represents data compiled from many jobs. The information does not represent the tasks of a single worker.

For those components with ranges such as SVP, Physical Demands, and Environmental Conditions, analysts deter-

Viewed on March 27, 2019

mine that a component rating falls somewhere within the range. They never, however, place the rating at a specific point. At a later time and based on many pieces of source material, when analysts select a rating for an occupational component, they determine that the typical rating for that occupation is somewhere within that range. Further, they never imply or determine that all jobs within a specific occupation across the United States have a rating at the same point within the continuum of the range.

Composite Occupational information Verses Specific Worker-Employer Information

People occasionally see significant differences between the work performed in the plant or establishment and the characteristics ascribed to the same occupation in the *Dictionary* or *SCO*. There are instances when the individual qualifications of a worker or the specific hiring requirements of an establishment for a specific position do not exactly mater the characteristics described for a broadly defined occupation, such as those contained in the *SCO*.

Based upon fact-to-face observation/interviews with incumbents and/or their supervisors, USES occupational analysts rate jobs, not workers, that is, they rate what jobs generally require of workers and not what individual workers are expected to perform on specific jobs. An individual employer may demand specific position requirements (tasks) from an incumbent, such as the ability to speak, read, and write a second language, which are not included within the occupation as defined in the *Dictionary*. Unique hiring requirements are not sufficient to (1) cause the position to have a different Specific Vocational Preparation (SVP) Code from the occupation, (2) place the position within another occupation, or (3) change the rating of the composite occupation within which the position falls.

In addition, individual hiring requirements of tasks for a specific job in an establishment may exceed (or be less than) the equivalent component for the composite occupation as defined in the *Dictionary* and *SCO*. Isolated instances of such occurrences will not warrant changes to the composite occupational definition contained in these documents. Only observation by occupational analysts of changes in requirements in most of the jobs used as source material may result in a revision of the ratings for an occupation.

The USES emphasizes these limitations because occupational analysts are unable to study each job in every establishment in the United States. In addition, analysts also write definitions in such broad terms that every statement (or factor) may not match verbatim every position or job included within the occupation throughout the United States. Finally, employers may have hiring requirements for a specific position, which may or may not fall within the typical range for all similar positions identified with that occupation.

USES realizes that this is a highly technical field of study. Additional comments or questions regarding *SCO* ratings may be directed to staff in the Occupational Analysis Field Center nearest you. (See the address under special notice.)

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

01.01 Literary Arts

Occupations in this group are concerned with writing, editing, or directing the publication of fictional or nonfictional literary compositions, such as stories, plays, and poetry. Skills and abilities required typically include: Considerable knowledge of rules of grammar; having an extensive vocabulary; making decisions involved with editing and interpreting written material of others; and writing creatively or producing written or other forms that express original ideas, attract attention, or influence opinions.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

01.02 Visual Arts

Occupations in this group are concerned with creating original works of art to express or interpret ideas, or executing commercial art work to illustrate and/or advertise various products and materials. Included is the teaching of art, appraisal of art objects, restoration of paintings and other fine art objects, or design of products, scenery, and displays. Skills and abilities required include: Wide familiarity with artistic principles, techniques, and color tones; skillful movement of hands and fingers in use of drawing, sculpturing, painting, and photographic apparatus and implements; ability to visualize final products; and spatial perception and visual acuity to ascertain three-dimensional forms and arrangement.

01.07 Elemental Arts

Occupations in this group are concerned with providing entertainment and other diversions usually at circus, carnival, or amusement park settings. Skills and abilities required usually include: Speaking clearly and sincerely; attracting and maintaining attention of others; exhibiting poise and concentration; and applying principles and techniques peculiar to specialized amusement forms.

01.08 Modeling

Occupations in this group are concerned with modeling clothes and other products at fashion shows, posing for artists and photographers, and standing in for featured stars and appearing in crowd scenes in television and movie productions. Skills and abilities required typically include: Standing, sitting, posing (frequently for long periods), or walking before audiences, photographers, or artists; following directions with poise and self-assurance; graceful movement of eyes, hands, feet, and body to express emotions or convey various visual impressions; and creativity in applying makeup and arranging hair, clothing, and accessories to enhance appearance.

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

02.01 Physical Sciences

Occupations in this group are concerned primarily with conducting scientific study of non-living things, applying knowledge of mathematics, physics, or chemistry. Included are such activities as investigating, discovering, and testing theories; researching such fields as geology, astronomy, oceanography and computer science; and developing or improving materials or processes. Skills and abilities required include: Using logic or scientific knowledge to deal with various problems; understanding, interpreting, and expressing complex, technical, and scientific information often by nonverbal (numerical) symbols; determining differences in texture, color, shape, and size of objects; and using judgment or verifiable information to make decisions.

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

02.02 Life Sciences

Occupations in this group are concerned with research and experimental activities that increase human knowledge of living things, such as plants and animals. Inclusions cover environmental impact on plant and animal life, disease origins, and disease control. Skills and abilities required include: Applying knowledge, logic, and scientific methods to study function and classification of living things; using eyes, hands, and fingers together to handle sensitive laboratory and scientific equipment; directing others in varied, changing assignments; interpreting and reporting technical and scientific data; and making judgmental and verifiable decisions.

02.03 Medical Sciences

Occupations in this group are concerned with diagnosis, treatment, and prevention of human and animal diseases, disorders, or injuries. Skills and abilities required include: Applying logic, scientific information, and knowledge to diagnose and treat humans and animals who may be in pain or under stress; precise movement of eyes, hands and fingers to perform surgical procedures; staying cool and calm during emergencies; and making critical decisions and judgments.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

02.04 Laboratory Technology

Occupations in this group are concerned with the use of laboratory techniques and equipment to perform tests or experiments in such fields as chemistry, physics, or biology. Skills and abilities usually required include: Knowledge and use of scientific and technical language and symbols; coordinated movement of hands, eyes, and fingers to use delicate and sensitive equipment, determining and measuring precise differences in shape, color, and texture of things and substances, following technical instructions; and using verifiable and measurable information to make decisions or judgments.

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

03.03 Animal Training and Service

Occupations in this group are concerned with caring for various kinds of animals and training or conditioning them for a variety of purposes (including exhibition, racing, and entertainment use). Excluded are occupations on farms, ranches or other places where animals are raised or bred. Skills and abilities required include: Knowing habits and physical needs of specific types of animals; using hands, eyes, feet, and body to care for, train, and ride animals; engaging in required physical work to keep surroundings (such as pet shops, zoos, circuses, aquariums, and racing stables) clean; observing animals for change in health and condition; and exercising patience in training animals to perform or obey commands.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

04.01 Safety and Law Enforcement

Occupations in this group are concerned with enforcing laws and regulations pertaining to safety and law and order, and investigation of violations. Skills and abilities required include: Knowledge of laws, regulations, and safety rules; patrolling assigned areas to assure that laws are enforced and violators arrested; organizing, planning, and directing work of others; using tact and courtesy to work with people; working under pressure or extreme circumstances; using weapons, fire-fighting equipment and safety devices skillfully; and keeping in good physical shape.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

05.02 Managerial Work: Mechanical

Occupations in this group are concerned with managing industrial plants or systems, such as manufacturing, processing, communications, mining, logging, petroleum production, construction, and materials handling where technical work is being performed. Skills and abilities required include: Planning and directing work of others; knowing technical details of specialty area; working with different kinds of people in a variety of situations; making decisions that may affect work activities, costs, or safety of others; using charts, maps, blueprints, or plans; and using numbers to plan budgets.

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

05.03 Engineering Technology

Occupations in this group are concerned with the collection, recording, and coordination of technical information in such activities as surveying, drafting, petroleum production, communications control, and material scheduling. Skills and abilities required include: Rendering ideas into accurate working drawings; coordination of eyes, hands, and fingers in use of drafting or measuring instruments; using geometry or other types of mathematics; writing technical reports; making decisions; and directing work of others.

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

05.04 Air and Water Vehicle Operation

Occupations in this group are concerned with controlling movement of aircraft, ships, boats, or other marine craft to transport passengers and cargo. Skills and abilities required include: Supervising or directing crews; knowledge of techniques and procedures for controlling aircraft or marine vessels; coordinated movement of eyes, hands, and feet to pilot or steer craft; reading instrument panels and identifying signal lights; reacting to emergencies; and making decisions and judgments affecting passenger safety.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

05.05 Craft Technology

Occupations in this group are concerned with performing highly skilled hand and/or machine operations, utilizing special techniques, training, and experience. Work settings include construction sites, machine shops, manufacturing establishments, and processing plants. Skills and abilities required include: Knowledge of tools, machines, materials, and methods used in trade or craft specialty; reading scale drawings or blueprints to visualize objects; using shop math to calculate object dimensions, material amounts needed, and material costs; coordinating eyes, hands, and fingers to use handtools or machines in constructing, making, or repairing objects; and adhering to object specifications or standards.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

05.06 Systems Operation

Occupations in this group are concerned with operating and maintaining equipment in a system, usually associated with generation and transmission of electricity; water treatment; oil, gas, and water transmission or distribution; or provision of telephone service to subscribers. Skills and abilities required include: Knowing the function of system specialty operated; directing work of others; coordination of eyes, hands, and fingers to run or adjust system; reading panel-board meter, dials, and gauges and using math skills to interpret readings; and remaining calm during emergencies.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

05.07 Quality Control

Occupations in this group are concerned with inspecting and/or testing materials and products for conformance to established standards. The setting is non-factory, occurring generally in construction, sawmill, petroleum refining, or with utility companies. Skills and abilities required include: Knowing about product, object, or material inspected; comparing object or material with written or oral specifications to determine quality and grade; using eyes, hands, and fingers to handle testing and measuring instruments; and recording or reporting test findings.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

05.08 Land and Water Vehicle Operation

Occupations in this group are concerned with driving trucks, vans, automobiles, locomotives, ambulances, and motorboats to move materials, deliver products, or transport sick or injured people. Skills and abilities required include: Knowing how to operate motor vehicles or control movement of marine craft; coordinating eyes, hands, and feet to control movement of vehicle or craft on roads or waterways; observing traffic regulations; being physically able to endure strain of driving for long periods with limited rest stops; and using arithmetic for collecting delivery receipts or money.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

05.10 Crafts

Occupations in this group are concerned with the skillful application of manual dexterity and use of handtools to fabricate, process, install, and/or repair materials, products, and structural parts. Work settings are usually repair shops, garages, wholesale and retail stores, construction sites, hotels and restaurants, or telephone and power companies. Skills and abilities required include: Understanding and following blueprints, sketches, drawings, and other written specifications; working to precise measurements; using arithmetic to measure and estimate material quantities; climbing and balancing on poles and ladders; staying calm during emergency or danger; lifting and moving heavy objects; and using hands, arms, and fingers to handle tools and/or operate machines.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

05.11 Equipment Operation

Occupations in this group are concerned with operating heavy machinery and equipment to dig, drill, dredge, hoist, or move substances and materials, or to pave roads. Skills and abilities required include: Operating heavy machinery and equipment; following work orders, signals, and oral instructions; coordinating eyes, hands, and feet to control movement of equipment; working outdoors during varying weather conditions; tolerating jolting, vibration, and noise of equipment; and estimating distances to move materials to specified sites.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

05.12 Elemental Work: Mechanical

Occupations in this group are concerned with performing a wide variety of unskilled tasks to move materials, clean work areas, run simple machines, or to assist skilled workers. Settings are generally non-factory, occurring in construction, mines, logging camps, hotels, and small shops. Skills and abilities required include: Using hands to carry and pull objects of varying weights; performing routine work repeatedly; following simple instructions; working outside; using an assortment of tools and equipment to shovel materials, clean work areas, and oil machinery; working under hazardous conditions; and being in good physical condition.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

06.01 Production Technology

Occupations in this group are concerned with setting up and operating machines, performing precision handwork, supervising and instructing personnel in machine use, and applying skills and knowledges of machines, techniques, and processes involved. Skills and abilities usually required include: Knowledge of production machine setup and adjustment; reading blueprints, wiring diagrams, and other work specifications; using eyes, hands, and fingers to assemble and/or handle precision instruments or objects; inspecting products for conformance to prescribed specifications; directing work of others; demonstrating operation of machines; and employing math skills to plan schedules and maintain production records and reports.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

06.02 Production Work

Occupations in this group are concerned with skilled handwork and operation of machines and equipment in factories and plants to process materials and make products. Product inspection is included. Skills and abilities typically required include: Following oral or written instructions to set up and operate production-type machines; using hands, eyes, and fingers to adjust machine controls, manipulate handtools, or assemble objects; directing work of others; staying within prescribed standards and guidelines; identifying variations in size, shape, and texture of objects; and working in hazardous or noisy conditions.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

06.03 Quality Control

Occupations in this group are basically factory-oriented and are concerned with inspecting, testing, weighing, grading, and sorting products and materials to ensure that items meet prescribed quality standards. Skills and abilities required include: Concentrating on doing same work repeatedly, following established procedures; using eyes, hands, and fingers to read and handle gauges and other testing devices and products during inspection process; separating work failing to meet predetermined standards; and using math skills to count or measure objects and keep inspection records.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

06.04 Elemental Work: Industrial

Occupations in this group are concerned with feeding, off bearing, or tending machines and equipment; using handtools; doing manual work; and assisting skilled workers, to process materials and make products, usually in an industrial setting. Skills and abilities required include: Adjusting to performing repetitious, uncomplicated work; following simple directions or instructions; observing safety rules; using hands, arms, and fingers to move or lift varying weights; loading, unloading, or tending assorted machines; and being exposed to heat, dust, noise, and hazards.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

07.01 Administrative Detail

Occupations in this group are concerned with overseeing and carrying out office operations, making determinations, and applying clerical skills and knowledge of administrative or other specialties relating to various professional, business, or government office activities. Skills and abilities required include: Planning own or others' work program; using reasoning and judgment to perform various clerical functions; using hand and fingers in typing, taking shorthand or dictation, and recording data; obtaining and safeguarding confidential information on individuals; proofing copy to correct errors in spelling, grammar, and punctuation; speaking distinctly when dealing with people in various situations; and making decisions involving company policy.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

07.02 Mathematical Detail

Occupations in this group are concerned with computing and keeping numerical information and records in business and government activities, using basic math skills. Skills and abilities required include: Planning; supervising others; using eyes, hands, and fingers simultaneously to record figures in ledgers or operate calculators or similar machines; knowing and applying basic record-keeping systems and procedures; concentrating on details; applying math skills to process numerical data; reviewing others' work for accuracy; and reading and copying numbers correctly.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

08.01 Sales Technology

Occupations in this group are concerned with selling items, such as manufacturing materials, industrial machinery and equipment, securities, insurance, services, merchandise, advertising, and real estate. They encompass performing as agents for manufacturers, realtors, wholesalers, retailers, and insurers. Also included are occupations involving the purchase of materials and products for resale. Skills and abilities required include: Applying knowledge and familiarity of technical equipment, product, or service offered for sale; discussing features of products or services convincingly to gain trust and confidence of potential buyers; computing costs, markups, and profit margins; preparing sales contracts and purchase orders; and finding errors in figures or wording in sales documents.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

11.06 Finance

Occupations in this group are concerned with accounting and auditing, records systems analysis, risks and profit analysis, brokering, and budget and financial control to design financial systems and to examine and interpret financial records. Skills and abilities required include: Applying mathematical knowledge to design financial recordkeeping systems; estimating value of real estate, personal or other property; planning, organizing, and directing work of others; speaking and writing clearly to communicate financial data; and applying math skills or computer technology to solve numerical problems speedily and accurately.

PART A

Titles Arranged By Guide For Occupational Exploration Group, SVP, and Strength Level

11.11 Business Management

Occupations in this group are concerned with the management of business establishments, such as wholesale and retail stores; credit, employment, or other specialty offices; and dining, lodging, and recreational facilities. Skills and abilities required usually include: Applying math skills to read and interpret business and statistical reports and records; analyzing and interpreting administrative policy and procedure; planning and organizing work of others; making decisions based on business reports or similar data; speaking and writing clearly; preparing budgets, keeping records, and inventorying stock; and dealing tactfully and courteously with the public, employees, or government officials.

APPENDIX A

Using Selected Characteristics for Occupational Exploration

Data in the *Selected Characteristics of Occupations* (SCO) may be used in a variety of ways to supplement data associated with the 12,741 occupations defined in the revised fourth edition *Dictionary of Occupational Titles* (DOT). The *Dictionary* contains occupations arranged according to similarities, such as tasks the worker must perform or knowledge the worker must have. The *SCO* provides lists of occupations arranged by similar Worker Characteristics required of an individual to fit a specific job-worker situation.

Based on data obtained and evaluated during job analysis studies to develop the revised *DOT*, analysts modified and prepared information for a significant number of occupations. Many of these had been published previously in the *Dictionary*; some had not. In addition, analysts revised their method of reporting ratings for clusters of Physical Demand (PD) and Environmental Condition (EC) components to reporting ratings for individual components.

The *Dictionary* provides information on the typical tasks of an occupation. Some users find it difficult to extract information that may appear to be implied about Worker Characteristics from the more explicit information about tasks. This publication provides users a means to access the Worker Characteristic ratings of Specific Vocational Preparation (SVP) as well as individual PD and EC ratings for all occupations defined in the *Dictionary*.

Use of these data with those contained in the Dictionary will permit better interpretation and evaluation of job characteristics for a wide range of occupations requiring similar adaptabilities and capabilities. Use of this supplement with the *Dictionary* can promote a better understanding of the relationships and/or differences among occupations and provide transfer possibilities from one occupation to another.

Among other uses, the data provides reference materials helpful in determining the potential transferability of impaired or physically handicapped individuals from one occupation to another while permitting them to retain their fullest possible application of experience and remaining functional capacity. In addition, it may also be useful in informing applicants for employment of occupations suited to the skills acquired on previous jobs; make use of military training and experience in assessing civilian occupations and conversely, consider civilian experience in assessing military occupations; redirect workers displaced because needed training; and help determine benefits eligibility for impaired individuals.

There may be situations for which an individual is interested in finding employment in another occupation in which either the typical Strength Level or level of Specific Vocational Preparation (SVP) is constant or changes in relationship to the levels associated with the individual's current job.

The following examples are only two of many possible scenarios for evaluating significant characteristics of workers to make occupational change. 1.An individual may be interested in finding employment in another occupation which requires less physical exertion but which allows the application of most or all of one's existing vocational preparation. 2. In other situations, an individual may be interested in an occupation for which the most important factor is applying existing vocational preparation while the strength required by the job is relatively unimportant.

Viewed on March 27, 2019

In such situations, it may be helpful to refer to the following table which contains information about the number of occupations in the *Dictionary* which have specific levels of Strength and SVP. After locating the cell in the table where a specific Strength Level intersects a specific SVP level, it is possible to determine the number of occupations in the *Dictionary* that have the same or a different level of Strength and/or SVP.

SVP And Strength Level Ratings of DOT Occupations

SVP	Sedentary	Light	Medium	Heavy	Very Heavy	Total
1	6	107	50	25	3	191
2	131	1464	917	400	22	2934
3	144	1067	724	247	17	2199
4	137	736	586	168	10	1637
5	140	540	397	110	18	1205
6	161	670	414	73	10	1328
7	298	1088	542	118	9	2055
8	352	628	140	23	3	1146
9	28	18	0	0	0	46
Total	1397	6318	3770	1164	92	12741

The *SCO relies heavily on the codinging system used in the Guide for Occupational Exploration* (GOE). It provides users with information about the interests, aptitudes, adaptabilities, and other requisites of occupational groups. The coding system described in the *GOE* is designed for use in self-assessment and counselor-assisted settings to help people understand themselves realistically in regard to their ability to meet job requirements. A brief decription of GOE coding structure and classification system is given below so readers may better understand hoe to use the *SCO*. (The *GOE* is also available from the U.S. Government Printing Office. Interested users are referred to that publication for more detailed information regarding applications of data contained in it and for expanded definitions of work groups.)

The assignment of a GOE code to a *Dictionary of Occupational Titles* definition, provides a linkage from the GOE arrangement of occupations with similar interests, aptitudes, adaptability requirements, and other requisites to the industrial- occupational coding system published in the *Dictionary*.

The GOE classification structure is organized into three levels. The first level is composed of twelve interest areas corresponding to interest factors identified through research conducted by the Division of Testing in the U.S. Employment Service. The interest factors, identified by a two-digit code, are defined in terms of broad interest requirements of occupations as well as vocational interests of individuals.

The second level subdivides interest areas into work groups. Each work group is composed of occupations that require similar adaptabilities and capabilities of the worker in similar work settings. Part A of this publication contains a short description of the types of occupations contained in each four-digit work group. Included at the end of the work group description is a brief list of skills and abilities usually required of workers in the group's occupations. (The GOE contains additional descriptive information for each work group.) In many interest areas, occupations that require the most education, training, and experience are in the first group while those requiring less formal education or experience are listed in the last group.

Work groups are subdivided into subgroups of occupations with even more homogeneous interests, aptitudes, and adaptability requirements. Each subgroup is identified with a unique six-digit code and title. In Part A of this publication, occupations that have the same six-digit GOE subgroup code are listed first by Specific Vocational Preparation (SVP) code (see Appendix B), then by Strength Level (see Appendix C), and finally by nine-digit DOT code (see Appendix E).

The next section describes the 12 GOE Interest Areas and outlines the Work Groups contains within each In-

Viewed on March 27, 2019

terest Area. Part A in the *SCO* is organized around these Interest Areas.

DEFINITIONS AND WORK GROUPS OF GOE INTEREST AREAS

01 Artistic

An interest in creative expression of feelings or ideas.

A person can satisfy this interest in several of the creative or performing arts fields. A person may enjoy literature and find writing or editing appealing. A person may prefer to work in the performing or visual arts. A person could direct or perform in drama, music, or dance, become a critic in painting, or create or decorate products. A person may prefer to model clothes or develop acts for entertainment.

01.01	Literary Arts
01.02	Visual Arts
01.03	Performing Arts: Drama
01.04	Performing Arts: Music
01.05	Performing Arts: Dance
01.06	Craft Arts
01.07	Elemental Arts
01.08	Modeling

02 Scientific

An interest in discovering, collecting, and analyzing information about the natural world and applying scientific research findings to problems in medicine, the life sciences, and the natural sciences.

A person can satisfy this interest by working with the knowledge and processes of the sciences. A person may enjoy researching and developing new knowledge in mathematics or solving problems in the physical or life sciences. A person may wish to study medicine and help humans or animals and work as a practitioner in the health field. A person may want to work with scientific equipment and procedures and seek a job in research or testing laboratories.

02.01	Physical Sciences
02.02	Life Sciences
02.03	Medical Sciences
02.04	Laboratory Technology

03 Plants and Animals

An interest in activities related to plants and animals, usually in an outdoor setting.

A person can satisfy this interest by working in farming, forestry, fishing, and related fields. A person may like doing physical work outdoors, such as working on a farm. A person may enjoy animals and train or take care of animals. A person may have management ability and could own, operate, or manage farms or related businesses or services.

03.01	Managerial Work: Plants and Animals
03.02	General Supervision: Plants and Animals
03.03	Animal Training and Service
03.04	Elemental Work: Plants and Animals

04 Protective

An interest in using authority to protect people and property.

A person can satisfy this interest by working in law enforcement, fire fighting, and related fields. A person may enjoy mental challenge and intrigue and could investigate crimes or fires. A person may prefer to fight fires and respond to other emergencies or may want more routine work, such as guarding or patrolling. A person may have management ability and could seek a leadership position in law enforcement and the protective services.

04.01	Safety and Law Enforcement
04.02	Security Services

05 Mechanical

An interest in applying mechanical principles to practical situations using machines, handtools, or techniques.

A person can satisfy this interest in a variety of jobs ranging from routine to complex professional positions. A person may enjoy working with ideas about things (objects) and could seek a job in engineering or a related technical field. A person may prefer to deal directly with things and could find a job in the crafts or trades and build, make, or repair objects. A person may like to drive or operate vehicles or special equipment. Or a per-

Viewed on March 27, 2019

son may prefer routine or physical work in settings other than factories, such as in mining or construction.

05.01	Engineering
05.02	Managerial Work: Mechanical
05.03	Engineering Technology
05.04	Air and Water Vehicle Operation
05.05	Craft Technology
05.06	Systems Operation
05.07	Quality Control
05.08	Land and Water Vehicle Operation
05.09	Materials Control
05.10	Crafts
05.11	Equipment Operation
05.12	Elemental Work: Mechanical

06 Industrial

An interest in repetitive, concrete, organized activities in a factory setting.

A person can satisfy this interest by working in one of many industries that manufacture goods on a mass production basis. A person may enjoy manual work or using handtools. A person may prefer to operate, take care of, or set up machines; supervise other workers; or inspect, sort, count, or weigh products.

06.01	Production Technology
06.02	Production Work
06.03	Quality Control
06.04	Elemental Work: Industrial

07 Business Detail

An interest in organized, clearly defined activities requiring accuracy and attention to details, primarily in an office setting.

A person can satisfy this interest in a variety of jobs by attending to the details of a business operation. A person may enjoy using math skills and find a job in billing, computing, or financial record keeping satisfying, or enjoy operating computer terminals or typewriters. A person may prefer to deal with people and want a job meeting the public, talking on the telephone, or supervising other workers.

07.01	Administrative Detail
07.02	Mathematical Detail
07.03	Financial Detail
07.04	Oral Communications
07.05	Records Processing
07.06	Clerical Machine Operation
07.07	Clerical Handling

08 Selling

An interest in bringing others to a point of view by personal persuasion, using sales and promotional techniques.

A person can satisfy this interest in a variety of sales jobs. A person may enjoy selling technical products or services. Or a person may prefer a selling job requiring less background knowledge and work in stores, sales offices, or customers' homes. A person may wish to buy and sell products to make a profit. A person may also satisfy this interest in legal work, business negotiations, advertising, and related fields found under other categories in the GOE.

08.01	Sales Technology
08.02	General Sales
08.03	Vending

09 Accommodating

An interest in catering to the wishes and needs of others, usually on a one-to-one basis.

A person can satisfy this interest by providing hospitality services in hotels, restaurants, or airplanes, or by taking tickets, carrying baggage, or ushering. A person may enjoy improving the appearance of others and work in the hair and beauty care field.

09.01	Hospitality Services
09.02	Barber and Beauty Services
09.03	Passenger Services
09.04	Customer Services
09.05	Attendant Services

10 Humanitarian

An interest in helping individuals with their mental, spiritual, social, physical, or vocational concerns.

A person can satisfy this interest by caring for the welfare of others. When spiritual or mental well-being of others is a concern, a person could prepare for a job in religion or counseling. A person may wish to help others with physical problems and work in the nursing, therapy, or rehabilitation fields. A person may like to provide

Viewed on March 27, 2019

needed but less difficult care by working as an aide, orderly, or technician.

10.01 Social Services
10.02 Nursing, Therapy, and Specialized Teaching Services
10.03 Child and Adult Care

11 Leading-Influencing

An interest in leading and influencing others by using high-level verbal or numerical abilities.

A person can satisfy this interest through study and work in a variety of professional fields. A person may enjoy the challenge and responsibility of leadership and seek work in administration or management. Or a person may prefer working with technical details and find satisfaction in a job in finance, law, social research, or public relations. A person may like to help others learn by working in education.

11.01 Mathematics and Statistics
11.02 Educational and Library Services
11.03 Social Research
11.04 Law
11.05 Business Administration
11.06 Finance
11.07 Services Administration
11.08 Communications
11.09 Promotion
11.10 Regulations Enforcement
11.11 Business Management Services
11.12 Contracts and Claims

12 Physical Performing

An interest in physical activities performed before an audience.

A person can satisfy this interest through jobs in athletics, sports, and by performing physical feats. A job as a professional player or official may be appealing. Or a person may wish to develop and perform special acts, such as acrobatics or wire walking.

12.01 Sports
12.02 Physical Feats

APPENDIX B

Specific Vocational Preparation

Specific Vocational Preparation (SVP) is the amount of lapsed time required by a typical worker to learn the techniques, acquire the information, and develop the facility needed for average performance in a specific job-worker situation. Lapsed time is not the same as work time. For example, 30 days is approximately 1 month of lapsed time and not six 5-day work weeks, and 3 months refers to 3 calendar months and not 90 work days.

SVP excludes orientation time required of a fully qualified worker to become accustomed to the special conditions, as well as establishment policies, of any new job. Further, SVP does not include time a worker spends obtaining reasoning, language, and mathematical skills which are often (1) learned in school and (2) are also necessary for a person to be able to function in society. [In the Occupational Analysis Program of the U.S. Employment Service, a difficulty factor, not a time factor, is assigned to the component used to estimate reasoning, language, and math skills (General Educational Development - GED).]

SOURCES OF SPECIFIC VOCATIONAL PREPARATION

SVP may be acquired in a school, work, military, institutional, or vocational environment through such settings as:

- vocational education (high school; commercial or shop training; technical school; art school; and that part of college training which is organized around a specific vocational objective);
- apprenticeship training (for apprenticeable jobs only);
- inplant training (organized classroom study provided by an employer);
- on-the-job training (serving as learner or trainee on the job under the instruction of a qualified worker);
- essential experience in other jobs (serving in less responsible jobs which lead to the higher grade job or serving in other jobs which qualify).

SCALE OF SPECIFIC VOCATIONAL PREPARATION

Level	Time
1	Short demonstration only
2	Anything beyond short demonstration up to and including 1 month
3	Over 1 month up to and including 3 months
4	Over 3 months up to and including 6 months
5	Over 6 months up to and including 1 year
6	Over 1 year up to and including 2 years
7	Over 2 years up to and including 4 years
8	Over 4 years up to and including 10 years
9	Over 10 years

Viewed on March 27, 2019

CALCULATION OF SPECIFIC VOCATIONAL PREPARATION

The levels of SVP presented in the scale on the previous page are mutually exclusive and do not overlap. Time that applies to General Educational Development is not considered in estimating Specific Vocational Preparation. Analysts consider employer's requirements as well as similar jobs when they estimate an SVP level for a job, i.e., they do not restrict their rating to only the employer's stated vocational preparation requirements. When calculating SVP, analysts usually count the average four-year college curriculum as equivalent to two years of specific vocational preparation and each year of graduate school as a year of specific vocational preparation. If necessary, analysts may calculate two classroom hours of secondary school vocational education, as an hour of SVP. However, at the post-secondary level of vocational education, they count each classroom hour as an hour of SVP.

APPENDIX C

Physical Demands

Physical Demand components, as used within the U.S. Employment Service (USES) Occupational Analysis Program, provide a systematic way of describing the physical activities that an occupation requires of a worker.

Within USES, the assessment of physical demands

- is focused primarily on the physical demands of the job— not the physical capacities of the worker;
- provides the means to combine information about many jobs into composite occupational information;
- permits the matching of workers and jobs based upon the workers' capabilities;
- permits the modification of the physical demands of a job to fit the capabilities of disabled workers.

PHYSICAL DEMAND FACTORS AND DEFINITIONS

The Physical Demands of an occupation are described in relationship to twenty different factors.

1. STRENGTH

This factor is defined by one of five levels: Sedentary, Light, Medium, Heavy, and Very Heavy. Most jobs require workers to expend energy to some extent. The amount can be affected by a worker's body position and the frequency of the repetition of a task. For instance, a worker in an awkward crouching position may experience as much difficulty exerting five pounds of force as when exerting thirty pounds at waist height while standing. Further, a worker who continuously lifts, pushes, or pulls 15-pound objects or carries them over long distances may exert as much physical effort as when lifting, pushing, pulling, or carrying 30-pound objects over short distances on a frequent basis.

To determine Strength Level, analysts review three elements in the physical demands of a job and condense these three elements into a single rating reported as the overall Strength Level of the occupation. The three elements and their subcomponents are defined below:

a. Body Position

Standing: Remaining on one's feet in an upright position at a work station without moving about.

Walking: Moving about on foot.

Sitting: Remaining in a seated position.

b. Weight/Force

Lifting: Raising or lowering an object from one level to another (includes upward pulling).

Carrying: Transporting an object, usually holding it in the hands or arms or on the shoulder.

Pushing: Exerting force upon an object so that the object moves away from the force (includes slapping, striking, kicking, and treadle actions).

Pulling: Exerting force upon an object so that the object moves toward the force (includes jerking).

c. Controls: Hand-Arm and Foot-Leg

Viewed on March 27, 2019

Controls entail use of one or both arms or hands (hand-arm) or one or both feet or legs (foot-leg) to move controls on machinery or equipment. Controls include, but are not limited to, buttons, knobs, pedals, levers, and cranks.

Physical Demand factors other than those listed above may affect the Strength Level rating. Analysts consider these factors when they are present and adjust the overall Strength Level rating accordingly.

Sedentary Work

Sedentary Work involves exerting up to 10 pounds of force occasionally or a negligible amount of force frequently to lift, carry, push, pull, or otherwise move objects, including the human body. Sedentary work involves sitting most of the time, but may involve walking or standing for brief periods of time. Jobs may be defined as Sedentary when walking and standing are required only occasionally and all other Sedentary criteria are met. In Part A of this publication, occupations rated Sedentary have an **S** in the Strength column.

Light Work

Light Work involves exerting up to 20 pounds of force occasionally, or up to 10 pounds of force frequently, or a negligible amount of force constantly to move objects. Physical demand requirements are in excess of those for Sedentary Work. Even though the weight lifted may be only a negligible amount, a job/occupation is rated Light Work when it requires: (1) walking or standing to a significant degree; (2) sitting most of the time while pushing or pulling arm or leg controls; or (3) working at a production rate pace while constantly pushing or pulling materials even though the weight of the materials is negligible. (The constant stress and strain of maintaining a production rate pace, especially in an industrial setting, can be and is physically demanding of a worker even though the amount of force exerted is negligible.) In Part A of this publication, occupations rated Light have an **L** in the Strength column.

Medium Work

Medium Work involves exerting 20 to 50 pounds of force occasionally, or 10 to 25 pounds of force frequently, or an amount greater than negligible and up to 10 pounds constantly to move objects. Physical demand requirements are in excess of those for Light Work. In Part A of this publication, occupations rated Medium have an **M** in the Strength column.

Heavy Work

Heavy Work involves exerting 50 to 100 pounds of force occasionally, or 25 to 50 pounds of force frequently, or 10 to 20 pounds of force constantly to move objects. Physical demand requirements are in excess of those for Medium Work. In Part A of this publication, occupations rated Heavy have an **H** in the Strength column.

Very Heavy Work

Very Heavy Work involves exerting in excess of 100 pounds of force occasionally, or in excess of 50 pounds of force frequently, or in excess of 20 pounds of force constantly to move objects. Physical demand requirements are in excess of those for Heavy Work. In Part A of this publication, occupations rated Very Heavy have a **V** in the Strength column.

LIMITS OF WEIGHTS LIFTED/CARRIED OR FORCE EXERTED

Rating	Occasionally	Frequently	Constantly
Sedentary	*—10	*	N/A
Light	*—20	*—10	*
Medium	20—50	10—25	*—10
Heavy	50—100	25—50	10—20
Very Heavy	100 +	50 +	20 +

* = negligible weight; N/A = Not Applicable

In the preceding chart, lifting, pushing, and pulling are expressed in terms of both intensity and duration. Judgments regarding intensity involve consideration of the weight handled, position of the worker's body or the part of the worker's body used in handling weights, and the aid given by helpers or by mechanical equipment. Duration is the total time spent by the worker in carrying out these activities. Carrying most often is expressed in terms of duration, weight carried, and distance carried. This information is summarized in the table on the next page.

The range excludes the lower number and includes the higher number, i.e, the range 10—25 excludes 10 (begins at 10 +) and includes 25. Overlapping ranges of *—10 in the Occasionally column for Sedentary Work and Light Work occupations are differentiated on the

Viewed on March 27, 2019

basis of the worker's posture and the rate at which work is performed. For example, all Sedentary occupations involve sitting constantly. However, in some occupations workers sit constantly but exert force of an amount or at a frequency rate that exceeds those for Sedentary Work. Such occupations are, therefore, rated at least for Light Work.

ABSENCE OR PRESENCE OF OTHER PHYSICAL DEMAND COMPONENTS

Analysts use the following symbols to indicate the absence or presence (and when present, the frequency of occurrence) of the other nineteen Physical Demand components.

Code	Frequency	Definition
N	Not Present	Activity or condition does not exist.
O	Occasionally	Activity or condition exists up to 1/3 of the time.
F	Frequently	Activity or condition exists from 1/3 to 2/3 of the time.
C	Constantly	Activity or condition exists 2/3 or more of the time.

2. CLIMBING

Ascending or descending ladders, stairs, scaffolding, ramps, poles, and the like, using feet and legs or hands and arms. Body agility is emphasized. In Part A, the rating for the Climbing component appears second in the first Physical Demand column under the vertical heading **Cl.**

3. BALANCING

Maintaining body equilibrium to prevent falling when walking, standing, crouching, or running on narrow, slippery, or erratically moving surfaces; or maintaining body equilibrium when performing gymnastic feats. In Part A, the rating for the Balancing component appears third in the first Physical Demand column under the vertical heading **Ba.**

4. STOOPING

Bending body downward and forward by bending spine at the waist, requiring full use of the lower extremities and back muscles. In Part A, the rating for the Stooping component appears fourth in the first Physical Demand column under the vertical heading **St.**

5. KNEELING

Bending legs at knees to come to rest on knee or knees. In Part A, the rating for the Kneeling component appears fifth in the first Physical Demand column under the vertical heading **Kn.**

6. CROUCHING

Bending body downward and forward by bending legs and spine. In Part A, the rating for the Crouching component appears sixth in the first Physical Demand column under the vertical heading **Co.**

7. CRAWLING

Moving about on hands and knees or hands and feet. In Part A, the rating for the Crawling component appears seventh in the first Physical Demand column under the vertical heading **Cw.**

8. REACHING

Extending hand(s) and arm(s) in any direction. In Part A, the rating for the Reaching component appears eighth in the first Physical Demand column under the vertical heading **Re.**

9. HANDLING

Seizing, holding, grasping, turning, or otherwise working with hand or hands. Fingers are involved only to the extent that they are an extension of the hand, such as to turn a switch or shift automobile gears. In Part A, the rating for the Handling component appears ninth in the first Physical Demand column under the vertical heading **Ha.**

10. FINGERING

Picking, pinching, or otherwise working primarily with fingers rather than with the whole hand or arm as in handling. In Part A, the rating for the Fingering component appears tenth (last) in the first Physical Demand column under the vertical heading **Fi.**

11. FEELING

Perceiving attributes of objects, such as size, shape, temperature, or texture, by touching with skin, particularly that of fingertips. In Part A, the rating for the Feel-

Viewed on March 27, 2019

ing component appears first in the second set of Physical Demand ratings under the vertical heading **Fe**.

12. TALKING

Expressing or exchanging ideas by means of the spoken word to impart oral information to clients or to the public and to convey detailed spoken instructions to other workers accurately, loudly, or quickly. In Part A, the rating for the Talking component appears second in the second set of Physical Demand ratings under the vertical heading **Ta**.

13. HEARING

Perceiving the nature of sounds by ear. In Part A, the rating for the Hearing component appears third in the second set of Physical Demand ratings under the vertical heading **He**.

14. TASTING/SMELLING

Distinguishing, with a degree of accuracy, differences or similarities in intensity or quality of flavors or odors, or recognizing particular flavors or odors, using tongue or nose. In Part A, the rating for the Tasting/Smelling component appears fourth in the second set of Physical Demand ratings under the vertical heading **TS**.

15. NEAR ACUITY

Clarity of vision at 20 inches or less. In Part A, the rating for the Near Acuity component appears fifth in the second set of Physical Demand ratings under the vertical heading **NA**.

16. FAR ACUITY

Clarity of vision at 20 feet or more. (Note: There is no Physical Demand component for rating clarity of vision in the middle distance of 20 inches to 20 feet.) In Part A, the rating for the Far Acuity component appears sixth in the second set of Physical Demand ratings under the vertical heading **FA**.

17. DEPTH PERCEPTION

Three-dimensional vision. Ability to judge distances and spatial relationships so as to see objects where and as they actually are. In Part A, the rating for the Depth Perception component appears seventh in the second set of Physical Demand ratings under the vertical heading **DP**.

18. ACCOMMODATION

Adjustment of lens of eye to bring an object into sharp focus. This factor is required when doing near point work at varying distances from the eye. In Part A, the rating for the Accommodation component appears eighth in the second set of Physical Demand ratings under the vertical heading **Ac**.

19. COLOR VISION

Ability to identify and distinguish colors. In Part A, the rating for the Color Vision component appears ninth in the second set of Physical Demand ratings under the vertical heading **CV**.

20. FIELD OF VISION

Observing an area that can be seen up and down or to right or left while eyes are fixed on a given point. In Part A, the rating for the Field of Vision component appears last in the second set of Physical Demand ratings under the vertical heading**FV**.

APPENDIX D

Environmental Conditions

Environmental Condition components within the USES Occupational Analysis Program provide a systematic means to describe fourteen possible surroundings or settings in which the occupation is found or the job may be performed.

For thirteen of these factors, analysts determine whether a factor is absent or present. When they determine that a factor is present, they then determine whether it has an effect on the occupation in terms of its frequency of occurrence. (Analysts use the same scale and symbols, reproduced below, to rate both Environmental Conditions and Physical Demands.) For one factor, Noise, analysts estimate the general or typical intensity level of the immediate surroundings in which the occupation occurs. The scale for Noise Intensity Level appears with the definition for Noise.

ABSENCE OR PRESENCE OF ENVIRONMENTAL CONDITION COMPONENTS

Code	Frequency	Definition
N	Not Present	Activity or condition does not exist.
O	Occasionally	Activity or condition exists up to 1/3 of the time.
F	Frequently	Activity or condition exists from 1/3 to 2/3 of the time.
C	Constantly	Activity or condition exists 2/3 or more of the time.

ENVIRONMENTAL CONDITION FACTORS AND DEFINITIONS

1. EXPOSURE TO WEATHER

Exposure to outside atmospheric conditions. In Part A, the rating for the Exposure to Weather component appears first in the Environmental Conditions column under the vertical heading **We**.

2. EXTREME COLD

Exposure to nonweather-related cold temperatures. In Part A, the rating for the Extreme Cold component appears second in the Environmental Conditions column under the vertical heading **Co**.

3. EXTREME HEAT

Exposure to nonweather-related hot temperatures. In Part A, the rating for the Extreme Heat component appears third in the Environmental Conditions column under the vertical heading **Ho**.

4. WET AND/OR HUMID

Contact with water or other liquids or exposure to nonweather- related humid conditions. In Part A, the rating for the Wet and/or Humid component appears fourth in the Environmental Conditions column under the vertical heading **Hu**.

Viewed on March 27, 2019

5. NOISE INTENSITY LEVEL

The noise intensity level to which the worker is exposed in the job environment. This factor is expressed by one of five levels. In Part A, the rating for the Noise Intensity Level component appears fifth in the Environmental Conditions column under the vertical heading **No.**

Code	Level	Illustrative Examples
1	Very Quiet	isolation booth for hearing test; deep sea diving; forest trail
2	Quiet	library; many private offices; funeral reception; golf course; art museum
3	Moderate	business office where typewriters are used; department store; grocery store; light traffic; fast food restaurant at off-hours
4	Loud	can manufacturing department; large earth- moving equipment; heavy traffic
5	Very Loud	rock concert - front row; jackhammer in operation; rocket engine testing area during test

6. VIBRATION

Exposure to a shaking object or surface. In Part A, the rating for the Vibration component appears sixth in the Environmental Conditions column under the vertical heading **Vi.**

7. ATMOSPHERIC CONDITIONS

Exposure to such conditions as fumes, noxious odors, dusts, mists, gases, and poor ventilation, that affect the respiratory system, eyes, or the skin. In Part A, the rating for the Atmospheric Conditions component appears seventh in the Environmental Conditions column under the vertical heading **AC.**

8. PROXIMITY TO MOVING MECHANICAL PARTS

Exposure to possible bodily injury from moving mechanical parts of equipment, tools, or machinery. In Part A, the rating for the Proximity to Moving Mechanical Parts component appears eighth in the Environmental Conditions column under the vertical heading **MP.**

9. EXPOSURE TO ELECTRICAL SHOCK

Exposure to possible bodily injury from electrical shock. In Part A, the rating for the Exposure to Electrical Shock component appears ninth in the Environmental Conditions column under the vertical heading **ES.**

10. WORKING IN HIGH, EXPOSED PLACES

Exposure to possible bodily injury from falling. In Part A, the rating for the Working in High, Exposed Places component appears tenth in the Environmental Conditions column under the vertical heading **HE.**

11. EXPOSURE TO RADIATION

Exposure to possible bodily injury from radiation. In Part A, the rating for the Exposure to Radiation component appears eleventh in the Environmental Conditions column under the vertical heading **Ra.**

12. WORKING WITH EXPLOSIVES

Exposure to possible injury from explosions. In Part A, the rating for the Working with Explosives component appears twelfth in the Environmental Conditions column under the vertical heading **Ex.**

13. EXPOSURE TO TOXIC, CAUSTIC CHEMICALS

Exposure to possible bodily injury from toxic or caustic chemicals. In Part A, the rating for the Exposure to Toxic or Caustic Chemicals component appears thirteenth in the Environmental Conditions column under the vertical heading **TC.**

14. OTHER ENVIRONMENTAL CONDITIONS

Other Environmental Conditions, not defined above. These may include, but are not limited to, such settings as demolishing parts of buildings to reach and combat fires and rescue persons endangered by fire and smoke; mining ore or coal underground; patrolling assigned beat to prevent crime or disturbance of peace and being subjected to bodily injury or death from law violators; diving in ocean and being subjected to bends and other conditions associated with high water pressure and oxygen deprivation; patrolling ski slopes prior to allowing public use and being exposed to danger of avalanches. In Part A, the rating for the Other Environmental Conditions component appears last in the Environmental Conditions column under the vertical heading **Ot.**

APPENDIX E

Occupational Code Number

The last means or system of sorting/organizing occupations listed in Part A of this publication is by nine-digit DOT code. A DOT code is comprised of nine numbers subdivided into three sets containing three numbers. In the classification system used in the *Dictionary*, each digit has a specific purpose or meaning. Together, these nine numbers provide a unique code which identifies an individual occupation from all others listed in the *Dictionary*.

The first three digits of a code number identify a particular occupational group. All occupations are clustered into one of nine broad "categories" (represented by the first digit). Examples of categories are professional, technical and managerial; and clerical and sales occupations. Categories are further divided into 83 more specific "divisions" (the first two digits). Examples of divisions are occupations in architecture and engineering within the professional category, and stenography, typing, and related occupations in the clerical and sales category. Divisions, in turn, are divided into small, homogeneous "groups" (the first three digits). The *Dictionary* contains 564 groups.

According to the Occupational Analysis Methodology used within the U.S. Department of Labor, every occupation requires a worker to function to some degree in relation to data, people, and things. The middle three digits of the DOT code reflect the Worker Function relationships of an occupation, that is the ratings for this job in relationship to data, people, and things.. The table in the next column contains information that identifies the various code numbers used to represent the data function (fourth digit), people function (fifth digit), and things function (sixth digit) of occupations defined in the *Dictionary*.

WORKER FUNCTIONS

Code	Data (4th Digit)
0	Synthesizing
1	Coordinating
2	Analyzing
3	Compiling
4	Computing
5	Copying
6	Comparing

Code	People (5th Digit)
0	Mentoring
1	Negotiating
2	Instructing
3	Supervising
4	Diverting
5	Persuading
6	Speaking-Signaling
7	Serving
8	Taking Instructions-Helping

Code	Things (6th Digit)
0	Setting Up
1	Precision Working
2	Operating-Controling
3	Driving-Operating
4	Manipulating
5	Tending
6	Feeding-Off Bearing
7	Handling

Viewed on March 27, 2019

The last three digits of the occupational code number differentiate a particular occupation from all others. When a six-digit code is applicable to only one occupational title, the final three digits are always "010". When there is more than one occupation with the same first six digits, the final three digits are usually assigned in multiples of four, such as 010, 014, 018, and 022.

Originally all occupations with the same first six digits were in alphabetical order by title with the final three digits in sequential multiples of four. However, as occupations have disappeared from the economy (been deleted from the *Dictionary*), changed, or emerged, the titles and codes included in the *Dictionary* have not been realphabetized or renumbered.

Specific definitions of Categories, Divisions, and Groups are located throughout the *Dictionary*. For additional information about the twenty-four Worker Functions, see "Appendix B: Explanation of Data, People, and Things" in the fourth edition *Dictionary of Occupational Titles*, revised 1991 or "Chapter 3: Worker Functions" in the *Handbook for Analyzing Jobs*, 1991. Both U.S. Department of Labor publications are available through the U.S. Government Printing Office.

Physical Demands Factors

Appendix C contains additional information about Physical Demands.

Number	Heading	Physical Demands
1	St	Strength
2	Cl	Climbing
3	Ba	Balancing
4	St	Stooping
5	Kn	Kneeling
6	Co	Crouching
7	Cw	Crawling
8	Re	Reaching
9	Ha	Handling
10	Fi	Fingering
11	Fe	Feeling
12	Ta	Talking
13	He	Hearing
14	TS	Tasting/Smelling
15	NA	Near Acuity
16	FA	Far Acuity
17	DP	Depth Perception
18	Ac	Accommodation
19	CV	Color Vision
20	FV	Field of Vision

Limits of Weights Lifted/Carried or Force Exerted by Strength Level

Rating	Occasionally	Frequently	Constantly
Sedentary	*—10	*	N/A
Light	*—20	*—10	*
Medium	20—50	10—25	*— 10
Heavy	50—100	25—50	10—20
Very Heavy	100 +	50 +	20 +

* = Negligible Weight; N/A = Not Applicable

Absence or Presence of Physical Demand and Environmental Condition Components

Code	Frequency	Definition
N	Not Present	Activity or condition does not exist.
O	Occasionally	Activity or condition exists up to 1/3 of the time.
F	Frequently	Activity or condition exists from 1/3 to 2/3 of the time.
C	Constantly	Activity or condition exists 2/3 or more of the time.

Environmental Condition Factors

Appendix D contains additional information about Environmental Conditions.

Number	Heading	Environmental Condition
1	We	Exposure to Weather
2	Co	Extreme Cold
3	Ho	Extreme Heat
4	Hu	Wet and/or Humid
5	No	Noise Intensity Level
6	Vi	Vibration
7	AC	Atmospheric Conditions
8	MP	Proximity to Moving Mechanical Parts
9	ES	Exposure to Electrical Shock
10	HE	Working in High, Exposed Places
11	Ra	Exposure to Radiation
12	Ex	Working with Explosives
13	TC	Exposure to Toxic or Caustic Chemicals
14	Ot	Other Environmental Conditions

Noise Intensity Level

Code	Level	Illustrative Examples
1	Very Quiet	isolation booth for hearing test; deep sea diving; forest trail
2	Quiet	library; many private offices; funeral reception; golf course; art museum
3	Moderate	business office where typewriters are used; department store; grocery store; light traffic; fast food restaurant at off-hours
4	Loud	can manufacturing department; large earth- moving equipment; heavy traffic
5	Very Loud	rock concert - front row; jackhammer work; rocket engine testing area during test

The Handbook for Analyzing Jobs, 1991 contains additional information about components of occupational analysis used by the U.S. Department of Labor.
