US Brand Name

Cogentin

Descriptions

Benzotropine is used with other medicines to treat Parkinson's disease. By improving muscle control and reducing stiffness, this medicine allows more normal movements of the body as the disease symptoms are reduced. It is also used to control severe reactions to certain medicines that are used to treat nervous, mental, and emotional conditions (e.g., phenothiazine medicine such as prochlorperazine, Compazine®, Mellaril®, Phenergan®, Thorazine®, Trilafon®).

This medicine is available only with your doctor's prescription.

This product is available in the following dosage forms:

- Solution
- Tablet
